PROFILE

I am a 23-year-old graduate from Abertay University in Dundee. I am looking for employment so I can further my skills and get useful work experience. I am easygoing, kind, and always willing to help people when they need it. I think outside the box and solve problems in simple yet effective ways. As well as this, I learn very quickly and find patterns to make learning and problem solving easier. I am always smiling and bring my good mood to wherever I go.

PAST EMPLOYMENT

Cosmic Coda – Spring and Summer of 2025

A student team of 8 people from different disciplines, who worked together to make Elusive Core: Zero Trace and got feedback from an industry client to adjust to their tastes and specifications. We later took the game to DARE Academy 2025 as a finalist.

We had to communicate as a team to solve the various problems we faced and worked in an AGILE workflow to stay flexible. We utilized JIRA as well as daily stand ups for keeping track of tasks.

I still work with Cosmic Coda for game jams and smaller projects on the side, so I am constantly improving my skills.

Respons Analyse - Summer and Fall of 2021

The post involved:

- Interacting with the general public
- Strict time management
- Friendly and approachable personality

VOLUNTEERING & ACHIEVEMENTS

- In 2016, I helped primary school children learn coding, and did so again in 2017 to encourage learning and computer science (Kidsakoder)
- In 2018, I assisted a cinema full of 3rd and 4th graders to learn programming, helped those that needed help, and demonstrated the solution on the big screen. This was an effort to get more women into computer science (Girls Tech Fest)
- In 2018, Worked in a team to develop a phone application
- In 2025, My team Cosmic Coda got accepted into DARE Academy, where we expanded upon our game and learned a lot from mentors in industry.
- In 2025, I showcased said game at the 6th Ada Scotland Festival, to promote gender diversity in computing science and technology
